## REPORT.

The Bulletin prints this morning an abstract of the blennial report of State Highway Commissioner Macdonald, which is worthy of close perusal since law in its entirety, of the misinterpretations of the law, with a legal opinion of the attorney general of the state, and details of operation and a layout of the needs of the department thich is edifying and justifying from start to finish. The commissioner, in the pursuance of his duties for the past thirteen years, has had to deal with men of all sorts of political pro-citvities, all kinds of personal megrims and all sorts of individual motives; and he knows just as well as The Bulletin does, that by scratching a Tartar you will find a Turk, and that scratching a grafter you will find a political In dian; and when any of these political Indians have ventured to try to take his sealp, the things he refused to do furnished the motive rather than anything he had failed to do. His loyalty to the law and his strict interpretation of it and his honest guarding It is not an easy matter to forgive the state funds have made him eniles, of course; but he has always triumphed over them and arways will ecause his public sets will endure the

He was overheard by a fireman freely expressing his poor opinion of the man who "douse the glim," and when spoken to he was flerce in his assault upon the fighter of the flames. Before he knew it, the fault-finder was knocked into the mid. dle of the street. He picked himself and for a while was slient as to the fire fighting methods of the Manchester department. The fireman sought the chief of police, told him of the episode, and said he was willing ter without taking water. to pay the probably \$20 fine which would be imposed in case the assaulted person made a complaint, but the chief assured him that he guessed one who worries him most. there would be no comeback and up to

"He is not yet 20, and has \$900 in the bank," was what one man was telling another about a youngster who was making his own way in the world. This is a manifestation of ability, which promises well for the future of that youth. It is better to be an economist than a spendthrift at that age. To know the value of a bank account then pressages a more abundant thrift later on.
